

Waste disposal

- Summertime use a company called Direct 365 to dispose of nappy and sanitary waste .
- Nappies, used gloves and aprons are disposed into a nappy liner bag within a nappy bin containing a clinical waste yellow liner next to the changing area.
- At the end of each day, or lunchtimes if the bins are full, the bags are tied and put into a locked yellow bin which is stored outside the front of the building.
- The sanitary bin (kept in the disabled toilet) is emptied regularly.
- Any bodily fluids are disposed of in a nappy bag and put into the nappy bins and disposed of the same way .
- General waste, food waste and recycling is taken daily to be collected at the THS commercial waste bins.
